

CITY OF MEXICO BEACH
2021 CITY-WIDE SIGN REPLACEMENT
REQUEST FOR BIDS 2021-010

ADDENDUM NO. 1

April 13th, 2021

The Bid Date for this project has been lengthened to **2:00 P.M. CST April 23rd, 2021**.

Question 1: Post are not big enough. Should be 3" at least. FDOT requires 3" for this type of application.

Question 1 Response: Within City of Mexico Beach Right of Way, please adhere to minimum requirements for signage installation and guidance defined in the latest version of MUTCD for signage for residential/city streets. For signage within FDOT right of way, follow installation and guidance according to FDOT standards and specifications. Please update the size and quantity clearly on the Bid Form accordingly. Within FDOT right of way, post should be 3" per FDOT standards, however, for residential streets within City Right of Way, please utilize the minimum required post size per the latest guidance in MUTCD for signage.

Question 2: 10' Post are not tall enough to get the standard 7' clearance and 3.5 ft in the ground. Should be 12' minimum.

Question 2 Response: Follow the minimum requirements as provided by the latest version of MUTCD (for residential streets within City Right of Way) and FDOT requirements (within FDOT right of way) to achieve the minimum 7 ft clearance. Please bid accordingly.

Question 3: What is the definition of pole dead man? Typically there is no concrete around the base. A soil Plate keeps the sign in position and will allow it to breakaway.

Question 3 Response: Deadman refers to the pole anchor plate/anchor system as specified per MUTCD and FDOT specifications. The Bid Form has been updated for clarification.

Question 4: What are Stop Sign brackets? Typically the panel cost included the Zee Bars that are FDOT approved for application and wind.

Question 4 Response: The brackets for stop signs can be either U-bolt bracket or Zee Bar bracket. These were included as separate line items in the Bid Form. If these are priced together as part of the sign itself, please make a note to this effect in the Bid Form (in other words, if the price for the stop sign is all-inclusive, please note this on the Bid Form).

Question 5: Would it be better to have all the street signs look uniform and be all the same size in height. The length is obviously determined by the length on the name. Typically all the heights are 8".

Question 5 Response: All street signs should be 8" height per MUTCD requirements.

Question 6: Speed Limit signs are typically 24" X 30". FDOT

Question 6 Response: Speed limit signs should adhere to the minimum MUTCD/FDOT requirement. The Bid Form has been revised to reflect this clarification.

Question 7: Can you provide the bid documents on the signs?

Question 7 Response: There are no separate bid documents for the signs. Please adhere to the standards and specifications provided in the latest version of MUTCD for residential streets and FDOT for signage with the FDOT right of way.

Question 8: Also, where do you advertise your solicitations?

Question 8 Response: The City advertises in the Panama City News Herald and on the City of Mexico Beach website under "news".

Question 9: I saw that Mexico Beach is replacing all street signs and was interested in bidding. Can you tell me where I can get documents/drawings for the project?

Question 9 Response: Currently there are no drawings for this project, however, GPS locations for all signs is attached to this Addendum No. 1.

Attachments included with Addendum No. 1:

- Revised Bid Form
- GPS Locations of signs
