PRECAUTIONARY BOIL WATER NOTICE
City of Mexico Beach, PWS# 1030467

To: Residents and Businesses with service connections along South 39th Street.

At approximately 8:00 pm on July 19, 2020, the city of Mexico Beach had to shut down the water main on South 39th Street. This shut down was a result of a rupture in a 4" water main at a weld joint. Repairs was completed at approximately 11:00 pm on July 19, 2020 and water was restored.

What should I do?

As a precaution, we advise that all water used for drinking, cooking, making ice, brushing teeth, or washing dishes be boiled. A rolling boil of one minute is sufficient. As an alternative, bottled water may be used. Residents are also advised to take precautions when bathing, especially immunocompromised individuals, infants, or the elderly.

What happened? What is being done?

A loss in system pressure could cause back-siphonage of contaminants, such as E. coli bacteria, into the water system. Water containing E. coli bacteria can be considered safe for drinking and cooking after vigorously boiling the water. Disease symptoms caused by these bacteria may include diarrhea, cramps, nausea, and possibly jaundice, and any associated headache and fatigue. EPA has set an enforceable drinking water standard for E. coli to reduce the risk of these adverse health effects. Under this standard all drinking water must be free of these bacteria.

The water system is currently collecting samples to determine if the presence of E.coli bacteria exists within the water system. This precautionary boil water notice will remain in effect until the problem has been corrected and a bacteriological survey shows that the water is safe to drink. The anticipated date for rescinding this notice is **July 21, 2020**.

If you have any questions you may contact: Thomas Wilson, Utilities Superintendent (850) 247-3001.
