PRECAUTIONARY BOIL WATER NOTICE

City of Mexico Beach, PWS# 1030467

To: Residents and business owners from Joe Road & north 15th Street to Wysong Ave & north 15th street along north 15th street and all side streets that are between joe road and Wysong Ave.

The city of Mexico Beach had to shut down the 10" water main that runs along north 15th street due to a water main break. The shutting down of the water main was necessary to make the needed emergency repairs. This line was damaged by contractor installing underground cable.

What should i do?

As a precaution, we advise that all water used for drinking, cooking, making ice, brushing teeth, or washing dishes be boiled. A rolling boil of one minute is sufficient. As an alternative, bottled water may be used. Residents are also advised to take precautions when bathing, especially immunocompromised individuals, infants, or the elderly.

What happened? What is being done?

A loss in system pressure could cause backsiphonage of contaminants, such as e. Coli bacteria, into the water system. Water containing e. Coli bacteria can be considered safe for drinking and cooking after vigorously boiling the water. Disease symptoms caused by these bacteria may include diarrhea, cramps, nausea, and possibly jaundice, and any associated headache and fatigue. Epa has set an enforceable drinking water standard for e. Coli to reduce the risk of these adverse health effects. Under this standard all drinking water must be free of these bacteria.

The water system is currently collecting samples to determine if the presence of e.coli bacteria exists within the water system. This precautionary boil water notice will remain in effect until the problem has been corrected and a bacteriological survey shows that the water is safe to drink. The anticipated date for rescinding this notice is april 13, 2019.

If you have any questions you may contact: thomas wilson, utilities superintendent (850) 247-3001.
