Canal & City Hall Update April 7, 2017

CITY HALL

Painting on the inside is complete. Carpet is in the process of being installed. Bathrooms have toilets and sinks. Concrete was just poured in the front for the handicap spaces and sidewalk. A drain was also installed in the front to take care of standing water. Stormwater pipes have all been delivered and will be installed next week. We did get confirmation the office furniture will be delivered on the 20th. We will be in the new building the last week of April. The installation of the moveable files will be May 8 due to the fact they have a very busy schedule and have a special crew from Jacksonville.

CANAL

The jetty sheet piles are in and the cap is complete on the east-west run. The forms for the gravity wall are in progress. Also the 'bridge' connecting the east-west run to the north-south run is in progress as well. The picture shows the crew driving the poles.
