

Community Input

Overview

Stormwater Management and Open Space Project

The City of Mexico Beach, FL is working with a team of federal and state agencies to plan several stormwater management projects across the city that will improve water quality, reduce flooding, and increase resilience during future storm events. The stormwater components also integrate green space and recreational features such as greenway and blueway trails, as well as parks and community spaces to gather, play, exercise and enjoy nature. The city hopes the projects will lead to economic growth, increased tourism and improved quality of life in Mexico Beach.

The City of Mexico Beach is looking for your input on these projects.

Please fill out this survey to provide your input on the proposed design options. Your input is greatly appreciated! *The survey will be open until October 15, 2019.*

The survey includes links to the materials shared at the two Open House events in September. Those materials are also available below:

- Managing Stormwater for Resiliency and Recreation (8th Street Canal) (8.5 MB)
- Proposed City-wide Greenway and Blueway Trail System (trail maps, 1.5 MB)
- Proposed City-wide Greenway and Blueway Trail Types (types of trails, 25MB)
- Under the Palms Park Expansion (3MB)
- Expanding Community Spaces and Local Economy (City Pier Commercial Area and Parker Park Restoration) (4MB)
- Project Handout

Please contact City Hall at (850) 648-5700 with any questions.
